Nairobi, Kenya

An award-winning Product Designer experienced in designing B2B, B2C digital products, and scalable design systems, skilled in user research, usability testing, wireframing, prototyping, and visual design tools such as Figma, Adobe XD and Adobe Creative Suite. I am looking for a role where I can contribute my design expertise to meaningful projects, while expanding my skills in creating innovative, accessible, and user-focused digital products.

SKILLS

TECHNICAL

User research.
Usability testing.
Wireframes.
Prototypes
A/B Testing.
Figma, Figma AI and Adobe XD.
Lovable
Adobe Creative suite.
Design systems.
Design Tokens.
WCAG Accessibility.
Design Documentation.
Developer handoff.
HTML, CSS.
JavaScript
React.js

SOFT

Design Leadership.
Collaboration.
Good communication.
Problem solving.

WORK EXPERIENCE

PRODUCT UX DESIGNER - Palpeer

AUGUST 2024 – JANUARY 2026

Lead the design for currency exchange mobile app and admin dashboard.
Conducted user research, including interviews and surveys, to gather insights and inform design decisions.
Developed wireframes and interactive prototypes using Figma.
Iterated designs based on user feedback after usability testing to ensure seamless user experience.
Create a scalable design system solidifying visual and typographic consistency across the platform's UI and increased project delivery speed by 150%.

UX DESIGNER - Elkotech Solutions

December 2022 – July 2024

Collaborate with Elkotech's development team to design websites for different clients.
Extrapolate insights from qualitative user research to define personas, user flows, project deliverables, and success metrics.
Articulate design decisions shown in wireframes and high-fidelity prototypes to Elkotech's product team.

KEY PROJECTS

Transaction Monitoring and Fraud Detection Tool

Designed end-to-end user experiences for a transaction monitoring tool focused on transaction health monitoring, advanced pattern recognition, AI-powered fraud detection, regulatory compliance and risk analysis.

Role:

Designed real-time monitoring dashboards with transaction scoring, and real time alerts.
Collaborated with data engineers and product stakeholders to align UX decisions with AI/ML-driven insights and regulatory requirements.
Created scalable UI patterns for risk scoring, anomaly detection, and behavioral analytics across web-based enterprise tools

Ensured usability, clarity, and accessibility.

Impact:
Improved usability of complex financial data, enabling faster fraud detection and compliance decision-making.
Enhanced transparency and trust through clear audit trails, risk visualizations, and real-time alerts.
